

Asset Management – Out of the Box

AssetBlox is a new concept in Asset Management, providing all the information, tools and resources that are needed to implement and manage an ongoing program of effective Asset Management, right up to and including compliance with the new **BSI-55000** Asset Management Standard, everything you need from a single Box or via a Cloud Based instance.

Setup of **AssetBlox** is quick! Plug in the appliance or access your Cloud instance, create your key asset data i.e. Locations, Departments and Status and you are ready to create the asset types that you want to manage. Create each new Asset type, add in your required custom data and then choose to upload from your old spreadsheets, or start entering via the scanning app.

Apply your barcode label to your asset, scan with the app, select the correct asset type, enter the data and watch the asset upload to your **AssetBlox** data base.

Your **AssetBlox** manual then helps you to understand what processes you can put in place, so that you are able to continue to track your assets. Providing you with basic process flows to follow and simple work instructions that you can use to train staff members. Processes such as:

- **Goods in**
- **Stores and stock control**
- **Moves and Changes**
- **Repair and Warranties**
- **Removal or retirement**

Why Do Asset Management?

The purpose of Asset Management is to save your organisation money, Knowing what you own, where it is, who's using it and what each Item is worth is valuable information. Not only does it help you understand the value of the Assets that your organisation owns, but it is also the first steps on the path of saving money. **AssetBlox** is simple to implement and quick to start returning the data that you need to help you start saving your cash. Savings can be easily achieved by:

- ✓ Smarter Procurement
- ✓ Better spare equipment management
- ✓ Reduction in lost assets
- ✓ Better repair and warranty management
- ✓ Understanding Critical Assets and recovery
- ✓ More effective financial planning and budget setting

AssetBlox is already helping businesses save through smarter Asset management. **AssetBlox** has been designed for use by any organisation, in any sector, that needs to keep track of or manage their assets more closely. **AssetBlox** helps with the simple implementation of management processes, data recording, reporting and visibility.

J.A. From Allies and Morrison says...

"Since we implemented AssetBlox into our day to day work, it has made management of our assets easier to record and monitor. There are tons of customizations available to help you get what you want from the product and although the product is in its early stages, the potential is limitless and we would definitely recommend it!"

From within the **AssetBlox** app, loaded on your IOS or Android smartphone or tablet you can

- **Scan and Create New Assets – Of any Type**
- **Scan and Update any Existing Asset Data**
- **Scan and Update Data for multiple Assets – All Asset Types**
- **Scan and Create multiple new assets – All Asset Types**
- **Scan Additional data such as Serial Number Barcodes**
- **Assign assets to users, departments, functions or Locations**
- **Complete Interactive Audit Scans by Owners or Locations**
- **Manage Stores locations, Stock Levels and Consumable Assets**
- **Update Financial Information**
- **Attach Images or Docs to your Asset record**

Laser Scanning Devices are also available and can be purchased as an additional option.

AssetBlox Appliance

Techy Stuff

The AssetBlox appliance can be provided either as a physical box or as a cloud based instance. It has a web server and database built in and if you require more security, the option to use SSL is also available. The physical appliance plugs straight into your network and setup of the appliance is carried out via a web browser. If you need any more technical information then please contact us using the details below
